

## MOBILE SURVEILLANCE CCTV TOWERS

CONSTRUCTION - VACANT PROPERTY - BUILDING SITES -  
PUBLIC AREA SURVEILLANCE - BORDERS AND PORTS

### THE MOST ADVANCED SURVEILLANCE TOWER ON THE MARKET

LTS Mobile Surveillance Towers are designed to give the best security for temporary sites across the globe in many sectors such as vacant property sites, building sites and construction projects, public area surveillance and borders & ports.

### SET UP AND TESTED

Manufactured at our facilities in Worcestershire, UK, all of our towers are built in a flow process. Each tower is tested via pre-determined diagnostic checks and pre-delivery inspections, ensuring every tower is up to standard before leaving our premises.

### FIRST CLASS TECHNICAL SUPPORT

LTS pride ourselves in giving 10/10 technical support. We provide on the phone technical support with remote access 9-5 Monday to Friday and will provide training manuals and videos to help you while on site.

### TRANSPORTATION & LOGISTICS

Moving and siting the tower is easily achieved using the fully certified pallet truck we offer, or by using a pallet truck on site.

Our towers have four conveniently mounted hoisting points for use with any Hiab lifter for a truck and for multiple Tower transportation.

- Fully CE Certified
- Made in the UK

# Our Model Specifications

## HYDRA

### QUAD-PTZ TOWER WITH TRACKING

#### FEATURES

- 4x DarkFighter smart tracking PTZ cameras for a full 360 degree field of view.
- Internal mini screen for on site live view and setup.
- Dedicated LTS PCB for tower power management with live status LCD screen.
- Dual battery backup for at least 48hrs of back up time.
- Quick site set up without needing to winch the mast up and down to position camera views.
- 4TB HDD hard drive for at least 30 days of storage time.

## OCULUS

### QUAD-BULLET TOWER

#### FEATURES

- 4x DarkFighter motorized bullets with 50m IR range.
- Internal mini screen for on site live view and setup.
- Dual battery backup for at least 48hrs of back up time.
- Dedicated LTS PCB for tower power management with live status LCD screen.
- 4TB HDD hard drive for at least 30 days of storage time.

## SINGLE PTZ

### POSITIONING SYSTEM WITH DETECTORS

#### FEATURES

- 1x Positioning System Camera controlled by wireless GJD detectors. Option to add additional detectors separate to the tower.
- Internal mini screen for on site live view and setup.
- Dual battery backup for at least 48hrs of back up time.
- Dedicated LTS PCB for tower power management with live status LCD screen.
- 4TB HDD hard drive for at least 30 days of storage time.

# Our Model Specifications

## KRAKEN RADAR MULTI OBJECT TRACKING

### FEATURES

- Multi object tracking
- Priority movement setting
- Live and radar motion view
- 400M range
- Measures entire areas
- Multi terrain detection
- All weather detection

## VIEW BOX COMPACT RAPID DEPLOYMENT UNIT

### FEATURES

- Pole or wall mountable.
- Option for a smart tracking PTZ camera or dual turret camera setup.
- Built-in 3/4G router for remote access.
- Loudspeaker for audio challenge.
- Internal battery back up for short term power cuts.

## VIEW BOX PLUS POINT TO POINT COMMUNICATION

### FEATURES

- Ability to transmit multiple View Box units back to a central point.
- Central point could either be a tower or on site workstation.
- Up to 100m range between units (depending signal on site)
- Independent battery backup on each unit.

# Power Options

## THE RIGHT POWER OPTION FOR YOU

All telescopic towers are available with a variety of power options to suit site specific needs. This includes 110v/230v mains power or completely off-grid.

### MAINS POWER AS STANDARD

Each mobile tower is equipped with the ability to power from 110v or 230v mains power. Dedicated blue and yellow power inputs for easy on site connection.

### BATTERY BACKUP AS STANDARD

Dual battery backup on all full size towers giving a minimum of 48hrs back up power from a fully charged state.

### SOLAR PANEL ADD ONS

Dual solar panel add-on pack available for full size towers totalling nearly 800w of peak power generation.

### METHANOL FUEL CELLS

Methanol fuel cells with dedicated enclosure available for a complete off-grid tower - No mains power required! When combined with solar a standard specification tower will use no fuel for 5 - 6 months per year.
