

LTS now offer a NDAA Compliant Mobile Surveillance Tower

The National Defence Authorisation Act (NDAA) is a US Government Legislature designed to put an end to posed threats of Cyber Security in the Security and Surveillance industry. The legislation forbids the use of video surveillance, telecommunications services, equipment and components by specific vendors.

LTS UK are delighted to be able to offer a Mobile Surveillance Tower that adheres to NDAA regulations. The components of our Mobile Surveillance Towers are sourced from partners who comply with this regulation, along with the monitoring service.

NDAA MOBILE SURVEILLANCE CCTV TOWERS

CONSTRUCTION - VACANT PROPERTY - BUILDING SITES -
PUBLIC AREA SURVEILLANCE - BORDERS AND PORTS

THE MOST ADVANCED SURVEILLANCE TOWER ON THE MARKET

LTS Mobile Surveillance Towers are designed to give the best security for temporary sites across the globe in many sectors such as vacant property sites, building sites and construction projects, public area surveillance and borders & ports.

SET UP AND TESTED

Manufactured at our facilities in Worcestershire, UK, all of our towers are built in a flow process. Each tower is tested via pre-determined diagnostic checks and pre-delivery inspections, ensuring every tower is up to standard before leaving our premises.

FIRST CLASS TECHNICAL SUPPORT

LTS pride ourselves in giving 10/10 technical support. We provide on the phone technical support with remote access 9-5 Monday to Friday and will provide training manuals and videos to help you while on site.

TRANSPORTATION & LOGISTICS

Moving and siting the tower is easily achieved using the fully certified pallet truck we offer, or by using a pallet truck on site.

Our towers have four conveniently mounted hoisting points for use with any Hiab lifter for a truck and for multiple Tower transportation.
